

East Wimmera Health Service is evolving to meet the changing needs of communities by moving towards a community-based model of preventative healthcare. This shift aims to improve wellness, enhance access to personalised care, and ensure a sustainable future for healthcare in our region.

## OUR GOAL

### Implement an integrated model of Primary Care.

It involves nurses, allied health, home care services and GPs.

It needs an **organisation-wide** approach to deliver this change.

## KEY PRINCIPLES

Patient Centred

Multidisciplinary

Accessible

Builds the Workforce

Integrates Technology

## OUR FOCUS

Understanding and identifying opportunities with:

- **Internal** processes and practices at EWHS
- **Collaborations** with General Practices
- **Partnerships** and **affiliations** with specialist services

## OUR APPROACH

The Change Catalyst is our vehicle for change. It is a redesign program. It involves teams from clinical and non-clinical areas.

Define → Diagnose → Develop → Implement → Evaluate → Sustain

## SPECIFIC AREAS OF WORK

**Work Packages** are defined:

- Entering & Exiting Primary Care
- Multidisciplinary Team Care
- Workforce
- Systems that Support Delivery
- GP Integration

## WE ANTICIPATE A FUTURE THAT:

- Expands our profile and delivery of Primary Care services.
- Simplifies consumer access.
- Delivers intentional Multidisciplinary Care.
- Connects systems that support demand management, care coordination and discharge.
- Maximises available funding and revenue.
